1. True or False: Data values that differ significantly from other observations are dealt with at the end of the preprocessing process.

1 / 1 point

⦿ False

◯ True

✓ **Correct**
Exactly!

2. In which step you transform a given set of input features to generate a new set of more powerful features for prediction?   1 / 1 point

- ⦿ Feature Construction
- ◯ Feature Tuning
- ◯ Feature Selection

✓ **Correct**
Well done!

3. Which of the following are classic uses of Representation Transformations? (Select all that apply)

1 / 1 point

☑ Change data format for the model

> ✓ **Correct**
> Perfect!

☐ Normalization

☑ Vectorization

> ✓ **Correct**
> That's right!

☑ One-hot encoding

> ✓ **Correct**
> Good job!
